

Level 4 Riding: Test C

1. Trot a weave with cones (or other visible safe objects) set 10ft apart.
2. Continue at the trot and do two changes of direction (can be a lazy figure 8 or S pattern).
3. Walk a daisy pattern with correct bend (using 5 cones with one in the center and 4 cones in a square shape around the centre. Walk a small half circle to the right around the centre cone, then travel to an outer cone and make a left half circle, come in again to make a right half circle around the center cone, then go to the outer cone for a left half circle and repeat until you have gone around each of the 4 outer cones).
4. Trot over to where your egg and spoon (or cup of water) is set up. Be halted while you pick up an egg on spoon (or clear cup of water, or ball on spoon) and then ride a trot circle to the right. At the end of the circle halt and put your spoon/cup down.
5. Trot for about 20ft then transition into canter (right lead) for 4 strides and then trot.
6. Continue at trot and go over a small jump (about 1'6" – 2').
7. Make a change of direction at trot, and then transition into canter (left lead) for 4 strides and transition to trot for a couple strides.
8. Transition to walk and turn your horse so they can back through an L shape (use poles or visible objects set 4 ft apart).
9. Turn and transition to trot. Start with a lengthened faster trot and then turn and go to a slow shortened trot.
10. Transition to walk and do a Move with me and yield to the right (leg yield to the right and finish with a disengage of the hindquarters moving the haunches to the left).
11. **Bridless Transition:** Halt and take off your bridle, continue at walk and then ride a walking figure 8.
12. Walk about 10ft showing then halt, then walk another 10ft and then halt
13. Continue at walk and then halt and back up 5 steps. Halt to finish.

Note: Directions are less important – work within the space or arena you have. If you need to turn a corner to continue the pattern or make it work within your space, that is okay.
